

Author index

Beardsworth, A.D., 37
Beeston, D., 75
Bowlby, R.L., 1
Bresnen, M.J., 37
Bryman, A.E., 37
Carmichael, D.G., 161
Day, A.K., 245
Faulkner, A.C., 245
Ford, J.R., 37
Gray, C., 135
Greenslade, O.C., 189
Hughes, W.P., 57
Keil, E.T., 37
Kenley, R., 213
Kiangi, G.E., 189
Lansley, P.R., 19
Mastrandrea, F., 105
Peer, S., 151
Powell, C., 201
Pretorius, F.I.H., 87
Sabah, A.N.A., 189
Schrivier, W.R., 1
Singh, G., 189
Taylor, R.G., 87
Touran, A., 233
Tucker, S.N., 179
Walker, A., 57
Wilson, O.D., 213
Wray, K., 37

Subject index

- Activity sampling, recording methods, construction, productivity, work study, 151
- Agency, project management, liability, contract, negligence, 105
- Buildability, expert systems, planning, time prediction, estimating preliminaries, 135
- Building, conventionally-managed project, linear responsibility analysis, systems theory, project management, case study, private industry, 57
- Building costs, United States, composition of output, F. W. Dodge data, productivity, 1
- Building team, status, performance, survey, 245
- Building types, relative costs, unit costs, quality, cost trends, 201
- Case study, private industry, building, conventionally-managed project, linear responsibility analysis, systems theory, project management, 57
- Cash flow, estimating, logit transformation, idiographic methodology, construction management, 213
- Composition of output, F. W. Dodge data, productivity, building costs, United States, 1
- Computer packages, data acquisition, statistical data analysis, duration times, goodness of fit, time-lapse photography, 233
- Conflict, stress, coping techniques, construction industry, organization design, matrix organization, 87
- Construction, productivity, work study, activity sampling, recording methods, 151
- Construction costs, reliability, cost planning, statistical distribution, mathematical models, 179
- Construction industry, organization design, matrix organization, conflict, stress, coping techniques, 87
- Construction management, cash flow, estimating, logit transformation, idiographic methodology, 213
- Contract, negligence, agency, project management, liability, 105
- Conventionally-managed project, linear responsibility analysis, systems theory, project management, case study, private industry, building, 57
- Coping techniques, construction industry, organization design, matrix organization, conflict, stress, 87
- Cost planning, statistical distribution, mathematical models, construction costs, reliability, 179
- Cost trends, building types, relative costs, unit costs, quality, 201
- Data acquisition, statistical data analysis, duration times, goodness of fit, time-lapse photography, computer packages, 233
- Dependence, estimating, risk, Monte Carlo method, statistical method, independence, 75
- Duration times, goodness of fit, time-lapse photography, computer packages, data acquisition, statistical data analysis, 233
- Dynamic programming, optimization, investment decision, microcomputer, program, 189

- Earthmoving, quarrying, open cut mining, queueing analysis, field studies, 161
- Estimating, logit transformation, idiographic methodology, construction management, cash flow, 213
- Estimating risk, Monte Carlo method, statistical method, independence, dependence, 75
- Estimating preliminaries, buildability, expert systems, planning, time prediction, 135
- Expert systems, planning, time prediction, estimating preliminaries, buildability, 135
- Field studies, earthmoving, quarrying, open cut mining, queueing analysis, 161
- F. W. Dodge data, productivity, building costs, United States, composition of output, 1
- Goodness of fit, time-lapse photography, computer packages, data acquisition, statistical data analysis, 233
- Idiographic methodology, construction management, cash flow, estimating, logit transformation, 213
- Independence, dependence, estimating, risk, Monte Carlo method, statistical method, 75
- Investment decision, microcomputer, program, dynamic programming, optimization, 189
- Labour, recruitment, selection, site management, 37
- Liability, contract, negligence, agency, project management, 105
- Linear responsibility analysis, systems theory, project management, case study, private industry, building, conventionally-managed project, 57
- Logit transformation, idiographic methodology, construction management, cash flow, estimating, 213
- Management, research, planning, simulation, organization, 19
- Mathematical models, construction costs, reliability, cost planning, statistical distribution, 179
- Matrix organization, conflict, stress, coping techniques, construction industry, organization design, 87
- Microcomputer, program, dynamic programming, optimization, investment decision, 189
- Monte Carlo method, statistical method, independence, dependence, estimating, risk, 75
- Negligence, agency, project management, liability, contract, 105
- Open cut mining, queueing analysis, field studies, earthmoving, quarrying, 161
- Optimization, investment decision, microcomputer, program, dynamic programming, 189
- Organization, management, research, planning, simulation, 19
- Organization design, matrix organization, conflict, stress, coping techniques, construction industry, 87
- Performance, survey, building team, status, 245
- Planning, simulation, organization, management, research, 19
- Planning, time prediction, estimating preliminaries, buildability, expert systems, 135
- Private industry, building, conventionally-managed project, linear responsibility analysis, systems theory, project management, case study, 57
- Productivity, building costs, United States, composition of output, F. W. Dodge data, 1
- Productivity, work study, activity sampling, recording methods, construction, 151

- Program, dynamic programming, optimization, investment decision, microcomputer, 189
- Project management, case study, private industry, building, conventionally-managed project, linear responsibility analysis, systems theory, 57
- Project management, liability, contract, negligence, agency, 105
- Quality, cost trends, building types, relative costs, unit costs, 201
- Quarrying, open cut mining, queueing analysis, field studies, earthmoving, 161
- Queueing analysis, field studies, earthmoving, quarrying, open cut mining, 161
- Recording methods, construction, productivity, work study, activity sampling, 151
- Recruitment, selection, site management, labour, 37
- Relative costs, unit costs, quality, cost trends, building types, 201
- Reliability, cost planning, statistical distribution, mathematical models, construction costs, 179
- Research, planning, simulation, organization, management, 19
- Risk, Monte Carlo method, statistical method, independence, dependence, estimating, 75
- Selection, site management, labour, recruitment, 37
- Simulation, organization, management, research, planning, 19
- Site management, labour, recruitment, selection, 37
- Statistical data analysis, duration times, goodness of fit, time-lapse photography, computer packages, data acquisition, 233
- Statistical distribution, mathematical models, construction costs, reliability, cost planning, 179
- Statistical method, independence, dependence, estimating, risk, Monte Carlo method, 75
- Status, performance, survey, building team, 245
- Stress, coping techniques, construction industry, organization design, matrix organization, conflict, 87
- Survey, building team, status, performance, 245
- Systems theory, project management, case study, private industry, building, conventionally-managed project, linear responsibility analysis, 57
- Time-lapse photography, computer packages, data acquisition, statistical data analysis, goodness of fit, 233
- Time prediction, estimating preliminaries, buildability, expert systems, planning, 135
- Unit costs, quality, cost trends, building types, relative costs, 201
- United States, composition of output, F. W. Dodge data, productivity, building costs, 1
- Work study, activity sampling, recording methods, construction, productivity, 151
